The world's first sound bar with DTS Virtual:X®

Immersive Listening Pleasure Vast soundscape. Soak in it

World's first use of DTS Virtual:X*. 3D surround as you've never heard before. Just this one device gives you sound coming down from the ceiling — such as the sound of rainfall from the sky or a spaceship flying overhead. Soak in the immersive, stunning presence of your favourite movies, concert videos and games — as if you're really there!

* In-house research (as of May 2017). Available via future firmware update.

** Even if your sources are not compatible with 3D surround, a special "Up-mix" function provides enhanced multi-dimensional presence.

Hard to hear the dialog?

No more. With the YAS-207, you can hear it all. Fully dynamic, exceptionally clear sound — with a simple connection. What's more, a Clear Voice function brings the sound of narration and dialogue to the forefront, while keeping the overall sound quality intact. Movies, TV shows, sports commentary, news casts — all instantly more clear and audible.

Body-shaking bass

Bass to move you, and keep you moving! Powerful, profound movie theatre sound — right in your home. Since the YAS-207 system includes an external subwoofer, enjoy the explosive sounds of action movies and the electrifying atmosphere of concert videos — and make your home entertainment more exciting than ever.

Wireless, Ultimate Simple Design

Perfect blend. Your style, your room

Just 60 mm (2-3/8") high, the centre unit can fit in front of your TV, and never obstruct your view. Plus, you can attach it to a wall using the keyholes, and get amazingly great sound in a slim package — a perfect match for your TV, whatever the installation.

* Included attachment template makes it extremely easy to position the screws for installation.

Easy Connection, Infinite Fun

Stunning sound from palm of your hand

Stream your favourite music right from your smartphone, with true high-quality wireless performance.

The YAS-207 automatically enhances the high-end of compressed music sources (such as MP3) and deepens the mid-to-low ranges — giving you exceptionally vivid and warm sound of quality approaching the original.

Say good-bye to complexity

A simple HDMI connection is all you need for your TV and Blu-ray Disc™ player. Open the box, put the YAS-207 where you want, and connect the cables. Clean. Fast. Easy.

* HDMI cables sold separately

Easy to Use

Just one remote

If your TV is compatible with HDMI-CEC, you can turn the power on / off, switch inputs, adjust the volume and easily perform other operations in combination with the TV — with just a single remote.

Fingertip control

If you need to go deeper, there's a HOME THEATER CONTROLLER app, giving you smart operability in a beautiful, intuitive, and easy-to-understand design. Select the content you want to play, fine-tune the

sound quality, as well as turn the system power on and off — all with convenient fingertip control from your smartphone.

**Packed with Other Useful Features
 Advanced HDMI interface**

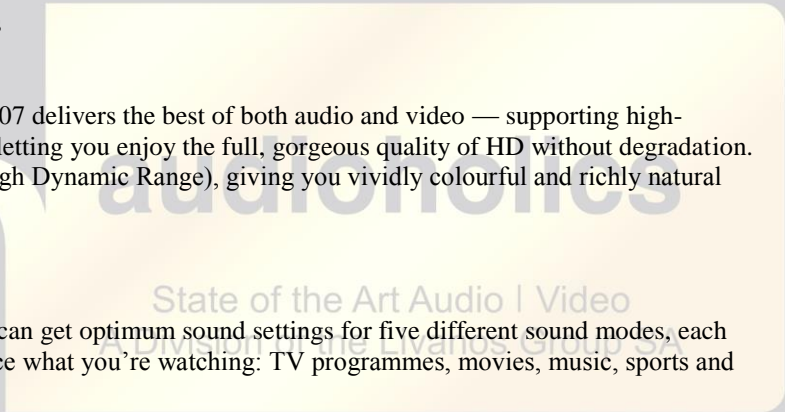

The HDMI interface of the YAS-207 delivers the best of both audio and video — supporting high-resolution 4K / 60p video signals, letting you enjoy the full, gorgeous quality of HD without degradation. It's also compatible with HDR (High Dynamic Range), giving you vividly colourful and richly natural picture quality.

Five surround modes

With the use of a special app, you can get optimum sound settings for five different sound modes, each programmed specifically to enhance what you're watching: TV programmes, movies, music, sports and games.

Wireless subwoofer

The YAS-207 also features a slim subwoofer. Thanks to the wireless connection, it fits cleanly and unobtrusively in any room, in any location. Put it in place, power it up, and enjoy truly dynamic, deep bass.
