AUDIOHOLICS® SOUTH AFRICA - State of the Art Audio | Video

Welcome to Audioholics®, your premier professional for home entertainment, technologies & installations. We bring you the finest products & technologies from around the world with a focus on customer service. Thrilled customers have enabled us to grow steadily while gaining an unmatched reputation for integrity & service. We invite you to browse our website which has more than 8,000 products with indicative pricing. Please feel free to book an appointment to visit our showrooms to demonstrate what we can offer.

WE LOOK FORWARD TO WELCOMING YOU TO OUR AUDIOHOLICS® FAMILY!

WHOLE HOME AUDIO & VIDEO

Our Audio & Video Systems allow all the members of the family to watch DSTV & movies or listen to multiple music sources anywhere in the home *independently*. Music can be played in the lounge, kids watch Netflix in their rooms, while you are enjoying your favourite radio station in the kitchen, *all at a touch of a button*.

Any room in the home can be easily controlled by a smart yet simple remote control, an App on a phone, tablet, or in-wall touchscreen. With the press of the *Entertain* scene on a keypad you can quickly turn on your favourite playlist throughout the entire home as guests arrive. We will ensure that you have the best quality Audio & Video throughout!

FULL HIGH DEFINITION AUDIO & VIDEO IN ANY ROOM

FOR THE MUSIC LOVER....

Our claim to fame since 2002 has always been to enjoy a musical experience that invokes emotions with exquisite Hi-Fi speakers and systems. Our equipment will deliver an authoritative and breath-taking audio experience, *even for the most discerning enthusiasts*. We will set-up your home to have access to more than 60 Million high quality music tracks which is growing daily!

It is important to partner with professionals such as ourselves that focus on service and quality. We have the largest product range in the country ranging from R1,000 to R4,5 Million for a pair of speakers. We will be here in the years to come as you may want to upgrade or change your equipment.

When you audition equipment in our showrooms, you will easily see & hear what different equipment can do. With our vast range and experience, we will gladly help you choose the right system.

COME LISTEN & YOU WILL SEE!

Once we have configured the right system for you, you will start to realise all you have been missing over the years as you will hear elements in your favourite music tracks that you have never heard before.

You truly start to hear your music for the first time, the way the artist intended.

BRINGING THE CINEMA & MOVIE NIGHTS TO YOUR HOME

From custom installed, hidden away speakers and electronics for your TV-Room to a fully-fledged dedicated home theatre-room or home-cinema; we will precisely design and install your system to provide an even better than cinema experience.

Our plush theatre seating is carefully selected & positioned to allow for unobstructed viewing of your video content on the big screen. Room-lighting is controlled in order to ensure the best picture delivery from a high-definition properly calibrated projector. We even have motorised hide-away projector screens that do not require a dark dedicated room and look spectacular in normal light conditions.

COMFORT & CINEMA FURNITURE

What better way to enjoy spectacular visuals and enveloping surround sound in luxurious comfort! We have seating solutions that allow you to customise your home cinema exactly as you please. Modular recliners that feature the highest quality fabric or leather, engineered specifically for cinematic viewing. All seating is custom made to your needs and style with optional features such as cooling cup holders, motorized recliners, consoles and LED lighting. We also have a huge selection of couches for the home.

YOUR STYLE**

WI-FI BACKED BY A POWERFUL NETWORK

Just as the internet is the electronic pulse that brings a connected home to life, your network is the central nervous system that carries critical information to all of your connected devices.

In our modern, continuously evolving & connected world, more and more devices are coming online, most notably in our homes - and it's more imperative than ever to have a robust, high-performing network that you can rely on.

Whether you have a few devices online or your home is brimming with automation, we can design a sophisticated network with the highest-quality products, all designed for the unique demands of your connected home to change and grow with technology.

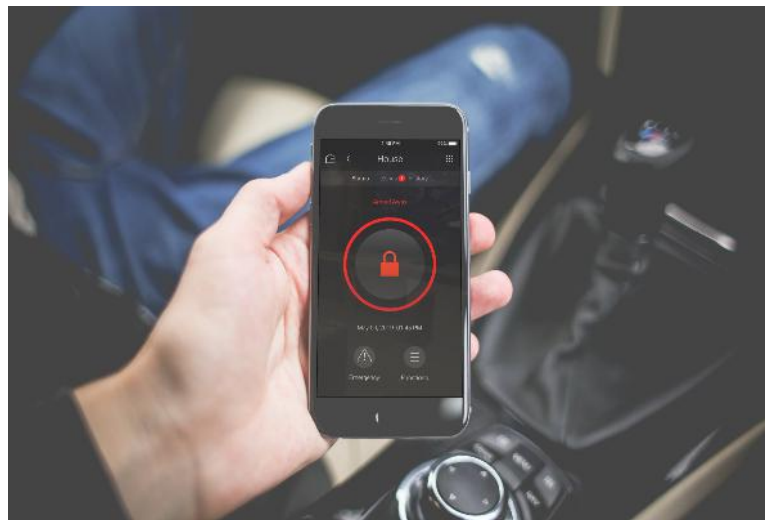

SMART SECURITY SYSTEMS

We provide you with 100% in-home & remote controlled surveillance and alarm systems via connected smart devices.

It's not just about convenience, it's about that all-important peace of mind for your home and family.

Our security solutions will easily allow you to do video & security checks and enable you to allow or deny access to your home from any location in the world.

CCTV CAMERA SYSTEMS

Security cameras are a crucial investment in protecting your home. Criminals shouldn't be able to get away with their deeds unnoticed. They may even get away scot-free if your home isn't equipped with the right technology to identify & deter potential threats.

Our security cameras combine convenience with advanced camera technology so you'll always have an eye on your home. You can view & record in HD quality. The cameras are designed to withstand any type of weather, *viewable from anywhere in the world!*

ALARMS & ACCESS CONTROL

Our systems allow for the security and convenience of your home to be of utmost importance.

When we integrate our home security system with a home automation system, it can provide you with an entirely new layer of security - such as turning lights on or off and locking doors remotely using an app.

Additionally, your smart home system can send a push notification, alerting you instantly that someone has accessed your home.

Be aware of who is coming or leaving your home with ease. Among many benefits, this can be a great feature for those who want to ensure that their family members, home contents and property is safe.

A HOME SECURITY SYSTEM IS CUSTOMISABLE FOR ANY BUDGET

There are options for a variety of budgets, from simple alarms to complex setups with cameras, 24/7 monitoring and even flood detectors. We can tailor-make solutions that work for you. We can assist you to determine what features your family needs.

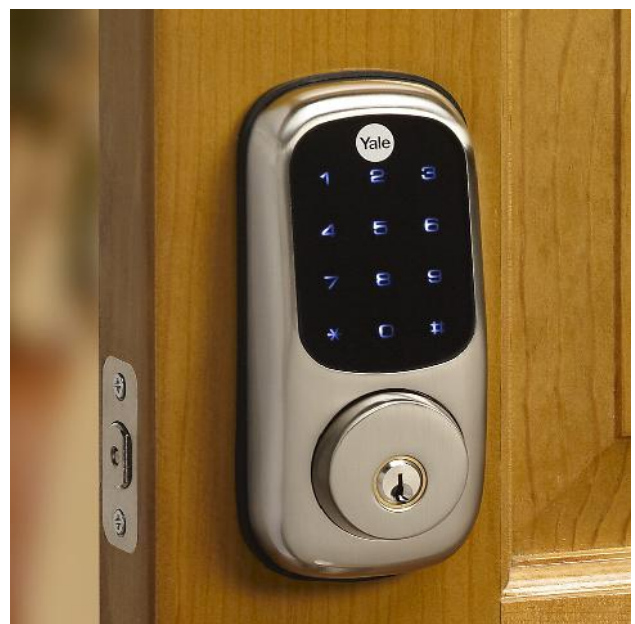

Open & Close your Garage, Front Door & Gates

FACTOR-IN YOUR FAMILY'S UNIQUE REQUIREMENTS

If you have pets, our systems can be adapted to reduce false alarms caused by their movement. If you have older family members living with you, you can get panic buttons that can call for help in case of a fall or emergency.

We can even set-up our systems to monitor the well-being of your elderly parents and detect if there may be something wrong and alert you!

The future of Safety is here!

SHADES, CURTAINS & BLINDS

Luxury and convenience has arrived! At a click of a button adjust your curtains & blinds to the selected position to allow for the desired amount of light or privacy. Control them individually or simultaneously by voice or with one touch on a smart device. Available for any type of window or opening.

Our motorized shades and curtains can be integrated into your home to easily create privacy or manage temperature throughout the day. Intelligent enough to automatically close in the living room when the afternoon sun reaches a certain temperature or time. The bedroom shades can automatically lower at night when ready for bed, or raised in the morning to welcome your family into the new day. We work closely with a shade, curtain and blind expert to ensure that everything works with our automation system.

ALL CUSTOMISED TO YOUR TASTE & STYLE

Installation, Design & Integration of Curtains & Blinds

CLIMATE CONTROL

For most people, home climate control means simply turning up the thermostat – or wrestling with the programming function to set day-time or night-time temperatures.

Thankfully, home climate control has come a long way! Working in tandem, our home climate control system can intelligently regulate heating and cooling or on the schedule you choose.

Our advanced thermostats save you money by controlling your home's temperature automatically throughout the day and are fully customisable to your needs.

Control your climate anywhere, anytime...SIMPLE

BESPOKE SPEAKER & SOUND SYSTEMS

Indoor

The seemingly simple purchase of a home audio system can become a nightmare. Key aspects are often overlooked and will result in an underwhelming, underperforming system which renders music to be more of a background distraction or can be frustrating for the family to use and enjoy.

We take imperative key ingredients into account for your audio system; performance expectation, aesthetic integration, functionality and ease of use that even granny will be able to use.

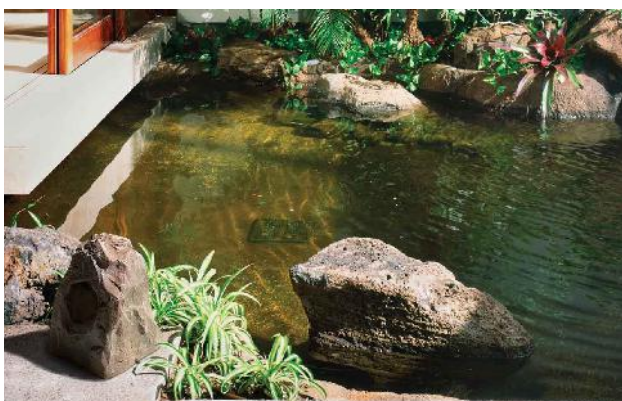

Our custom-designed systems vary from high-performance stereo systems to subtle, discrete background music. We have solutions from the simplest stand-alone wireless speakers to custom-installed hidden speakers and even speakers that resemble a work of art!

Outdoor

It doesn't get much better than having a swimming pool and a nice shaded patio to beat the South African heat. Unless of course you have an outdoor audio video system to entertain family and friends while enjoying the back yard amenities.

Watch the big game while you braai or enjoy your favourite music while you relax or entertain.

Imagine having speakers in the flower bed that looks like a rock or is hidden in your landscaping

DIGITAL HOME MEDIA LIBRARY - IT'S LIKE YOUR OWN OFFLINE NETFLIX AND PERSONAL FAMILY SERVER

Let us bring together all the media that matters to you. Your personal collection of family videos & photos, music, movies and TV-series will look beautiful alongside your stellar streaming content.

It's finally possible to enjoy all the media you love, stored safely in a single device.

We will build your digital media library system to enable you to organise all the videos you own, be it box-office movies or family photos & videos! Your content will be easy to find and watch on any smart device. No need to struggle showing footage & photos on your cell phone with friends & family anymore.

Share, reminisce and give your moments the spotlight on your TV or any device you choose. With feature-rich options for organisation and without the need to upload to a cloud, we can create the ideal solution for anyone with loads of high-quality photos, videos, movies, music and audio in any format.

HOME AUTOMATION & INTEGRATION

Homes have Lights, TVs, DSTV, Media players, Air-Conditioners, Security Alarms, Gates, Garages & Doors, CCTV, Music, Irrigation, etc. Our *Smart Customised Systems* will orchestrate your whole home seamlessly to maximize your comfort, convenience, entertainment & safety. One touch can dim the lights, play music, turn up the heat, lock the doors & arm the security system...**BRING IT ALL TOGETHER, SIMPLY!**

ANY HOME CAN BE SMART

It's a common misconception that in order to have a smart home, you must get in during the building phase. We've debunked that myth.

Any home, new or existing, can become the smartest on the block.

Our systems are modular and built to scale. Perhaps start off with an entry-level system that includes a universal remote to easily control all of your entertainment equipment.

When you are ready, add smart-lighting controls, touch-screen keypads, video inter-coms, voice control & touch-screen remotes. Alternatively, get ready to enjoy a full turn-key smart automated home.

**NO NEED FOR MANY APPS!
THE WHOLE HOME RUNS OFF 1 SIMPLE APP
ON YOUR PHONE OR SMART DEVICE**

**COMPLETE SMART
HOME CONTROL**

SMART LIGHTING CONTROL - FROM BRIGHT TO BRILLIANT

Lighting no longer needs to just be controlled with a conventional switch or dimmer anymore.

Our Smart Lighting Systems allows your home to intelligently set the perfect scene for a relaxing evening and make your life convenient by responding to your daily routine. Your home's lights can be controlled with a universal remote, custom engraved keypad switch buttons, by voice or smart device.

It can react intelligently for many different scenarios such as arriving home late at night or the alarm triggering etc. We can program the lights to be smart enough that as your movie starts, the lights will slowly dim and when you pause your movie, the lights will brighten...**THE POSSIBILITIES ARE ENDLESS!**

If your alarm detects an intruder, specific lights can be automatically turned on to assist in this type of emergency. Bedtime is also made easy - one button can turn your whole home's lights off.

Other than the sheer luxury and convenience of what smart lighting can do, the energy savings and longevity of bulbs are also a benefit.
